

Monadnock Farm Share Program

The Monadnock Farm Share program makes farm shares more accessible for Monadnock Region community members who otherwise would not be able to participate in a local Community Supported Agriculture (CSA) program.

What is a CSA?

CSAs support local farms by providing an upfront cost to help farms purchase seeds and tools for the season. Once the season begins, CSA customers pick up their weekly share of produce, while some farms deliver! Many farms offer half shares and full shares to accommodate different household sizes and needs!

How does the program work?

Customers cover 50% of the total farm share cost. This program is made possible through generous donations from private donors, Cheshire Medical Center's Center for Population Health, and through donations from participating farmers.

Applications are due May 30, 2022 and reviewed on a rolling basis! Limited spots available!
